Art Unit: 1761

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-57 are rejected under 35 U.S.C. 102(b) as being anticipated by Bosund et al (US 3924005), Hale (NOAA Technical Report), Hale (MFR Paper 1034), or Pigott et al (Journal of Food Processing and Preservation).

Bosund et al teach a fish protein isolate having a bland flavor, less than 0.5% lipids, and which is water-soluble at all pH values, wherein a comminuted fish material is subjected to enzymatic treatment (see entire patent, especially the abstract and the claims).

Hale (NOAA Technical Report) teaches a fish protein concentrate prepared by enzymatic hydrolysis as is claimed (see entire document).

Hale (MFR Paper 1034) teaches a fish protein concentrate prepared by using enzymes to solubilize protein and release lipids as is claimed (see entire document).

Pigott et al (Journal of Food Processing and Preservation) teach the enzymatic production of fish proteins as is claimed (see entire document, for example Figure 4).

The recitation that the product is made by a new process, if the process were indeed new and patentable, does not render an otherwise unpatentable product new and patentable. It is pointed out that the rejected claims are product claims and not process claims. The product must stand on its own invention, independently of the

process of producing same. See *In re Marosi*, 218 USPQ 195; *In re Thorpe*, 227 USPQ 964; *Ex parte Jungfer*, 18 USPQ 2nd 1976.
